**Attachments:** ITPE Report on Proposed Scottish Water Mitigation\_V2.pdf

Hi Rebecca

I have had no further response to the below criteria and therefore can confirm we are now content with the mitigation measures being put in place.

Please don't hesitate to contact me if you need anything else from us.

Thank you again for taking the time to produce the mitigation report and make the required amendments.

Kind Regards  
Jacqueline Tait

**Subject:** Energy Isles Wind Farm - mitigation for Gossa Water Catchment

Hi Jacqueline,  
Thank you once again for the call last week and your feedback. I can confirm that the Applicant is happy to increase the chemical water quality monitoring to fortnightly for one year prior to construction, throughout construction and one year post-construction. The Applicant will also set aside a £100,000 contingency fund for the duration of construction.

To this effect I have updated the attached report. I would be grateful if you can provide written confirmation that Scottish Water are satisfied with the mitigation measures for the Proposed Development outlined in the report.

Thank you  
Kind regards  
Rebecca
